I’ve always been fascinated by the bravery and perseverance of Lewis and Clark’s expedition. The tribulation they endured for the promise of discovery is inspiring and reflective of all that we love about this great country. The fact that some of their greatest experiences took place in our rugged backyard makes us proud that CRKT® has called Oregon home for over 20 years.

The drive to push forward into new frontiers has always fueled so much of what we do here at CRKT®—this year was no exception. We’re humbled by the creativity and know-how of the world-class designers we work with who take their craft as seriously as we do. On this note, we’re proud to have recently unveiled a game-changing innovation in Ken Onion’s Field Strip Technology.

Beyond working with creative and inspiring independent designers, we’ve found ourselves in excellent company due to our growing partnership with Ruger®. We’re lucky to have found people with whom we share fundamental values, and the drive to continue creating and delivering tools that satisfy our customers needs.

We’re not content simply working for ourselves, though. We recognize that none of this would be possible without the brave men and women in arms, so one of our core missions is to give back. Years ago, when Ryan Johnson told us he’d been privately working with returning combat vets to help them cope with PTSD by designing and creating custom tools, we jumped at the chance to help. We officially launched the Forged By War® program in 2016 and continue to produce mission-ready tools, designed by warriors, with a portion of the CRKT® profits donated to the veterans’ charities of choice.

To top it off, we closed out the year with a brand-new website. Finally, our site reflects the aesthetics and capabilities of our tools. We’re looking forward to the year ahead and thank you for being a part of our journey.

Rod Bremer
Founder
Field Strip

DESIGNED BY WORLD-CLASS KNIFEMAKER KEN ONION, FIELD STRIP TECHNOLOGY LETS YOU EASILY DISASSEMBLE YOUR KNIFE FOR CLEANING WITHOUT TOOLS.

Ken Onion
Ken is the real deal. The youngest ever inductee into the Blade Magazine Hall of Fame in 2008, he is recognized as one of the most innovative and successful knife designers of all time.
Most Innovative Design: 2016 Blade Show
Gear of the Year Selection: Men’s Journal
Most Innovative New Knife: KnifeNews Dealers’ Choice

CRKT.COM/FIELD-STRIP-TECHNOLOGY
In 2013, Ryan Johnson of RMJ Tactical, designer of elite, military, tactical tomahawks, approached CRKT® with the news that he had been privately working with a few combat veterans that had returned from war with varying degrees of post-traumatic stress disorder (PTSD).

To help work through their challenges, they had been forging steel into custom tools they wish they had available to them in the battle field. At times they worked in Ryan’s workshop; others on their own in garages, and even backyards.

CRKT® cares deeply about our returning veterans and we saw a way to give back to the community that created them. That’s why we launched the Forged By War® program.

These are mission ready tools, designed by warriors, with 10% of the CRKT® net profits donated to the veterans’ charity of choice.

Mission ready tools that are...Forged By War®.

See the tools on page 39.

The exclusive Ruger® knife line includes designs for everyday carry, hunting, tactical uses, and self-preparedness. Developed by six master knife-smiths who combined their knowledge of the art with aesthetic details from Ruger® firearms, the line offers unique knives with the important features that every good knife should have. These knives are purpose built to be durable and highly functional in the environments where Ruger® customers will expect them to perform.

THE TECH

FIELD STRIP
Designed by world-class knifemaker, Ken Onion, Field Strip lets you easily disassemble your knife whenever, wherever—without tools.

IKBS™
Designer Flavio Ikoma and Rick Lala invented this system that sets lubed ball bearings into the folding knife pivot. The result is rapid blade deployment that is smooth and fast. Go ahead, set a flipping land speed record.

SNAP LOCK™
This innovative cam locking system features a blade that can pivot 180°, simply press the thumb wheel and rotate the blade. When closed, the frame is an effective blade guard. When open, the harder you grip the handle, the more it locks the blade in place.

HOIST’N LOK®
An innovative lobed and knurled cam successfully locks the rope into place, eliminating the need for a difficult and often inconvenient tie off. With professional hunting guide Russ Kommer’s innovation, hoisting your game is now as easy as cleaning it with one of his blades.

VEFF SERRATIONS™
Some hone edges. Others, like “Edgeologist” Tom Veef, reinvent them, with his exclusive and patented Veef Serrations™ that offer superior cutting of cordage, rope, and fibrous materials—none are safe.

VEFF FLAT TOP SERRATIONS®
Tom Veef knows a thing or two about edges. As the world’s finest and only “Edgeologist,” he specializes in serrations that improve cutting efficiency. So you can go through fibrous materials like a torched straight edge does through cold butter.

EASY CLEAN SHEATH
Dirt, fuzz, muck, sand, and dust, all easily dispatched from your blade’s comfort zone. Slide this Easy Clean sheath apart and wipe away the grime. After you’ve cleaned your blades’ bedroom, click the two-piece sheath back together and create a dirt free zone for your blade to securely reside. It’s so easy.

M16®-ZLEK
When situations are coming on fast, you don’t have time to search for everything you need. Thankfully, the M16® Law Enforcement knives’ on-duty features include the Carson Flipper, seat belt strap cutter, and tungsten carbide window breaker, all built right in. Protect and serve.

KLECKER LOCK
Designer Glenn Klecker seamlessly integrated this lock directly into the handle. Goodbye traditional locking mechanisms. Hello new and exciting knife designs.

EXITOOL®
It’s a seat belt cutter that clips to your belt. It’s a window breaker and LED flashlight. If someone’s trapped in a vehicle, Russ Kommer’s tool can be the difference between life and death. Save lives.
**SAFETY & ACTUATION**

**FOLDER SAFETY SYSTEMS**

**ILS™**
The ILS™ Lock Safety or ILS™ gives you an extra layer of safety when work stuff like lint, dirt and grease, gunk up your locking liner. Flavio Ikoma, innovator of the IKBS™ pivot system, ingeniously added a lever with an elbow, which automatically puts a pin between the liner and frame. This helps prevent the liner from slipping down the blade ramp. When you’re done using your knife, press down on the ILS™ thumb rest and slide the locking liner over to disen-gage the safety. It’s always good to have a backup. Especially when it comes to safety.

**FOLDER ACTUATION SYSTEMS**

**OUTBURST® ASSISTED OPENING**
Lightning fast. Ridiculously easy to use. These are just a few of the ways people have described our patented opening system. Just manually open the blade up to 30 degrees and the patented OutBurst® assisted opening mechanism springs the knife fully open so that you’re good to go. The powerful spring also holds the blade securely closed when not in use. On many models, we’ve combined the OutBurst® system with our locking and actuation systems like Fire Safe™ for a new level of ease of operation, as well as security.

**LOCKING LINER SAFETY**
The CRKT® Locking Liner Safety innovation adds an ingenious layer of safety to your folding knife. The safety sets a pin between the locking liner and the frame. This pin acts as an additional layer of safety, so the locking liner is less likely to disengage during use. To engage the safety, push the manual safety lever forward. To close the knife, pull the manual lever back, slide the locking liner over, and fold the blade into the closed position. Many CRKT® folders feature this innovative safety system.

**FIRE SAFE™ SAFETY**
Easy-to-open and incredibly safe, you’ll see why we came up with the name we did for our patented system that relies on a pin at the locking liner. The actuation mechanism operates on folders through one of two opener styles:

- **FIRE SAFE™ THUMB STUD**
  Press the spring-loaded thumb stud to release the locking liner and pin.

- **FIRE SAFE™ THUMB DISK**
  Press the thumb disk to release the locking liner and pin.

Whichever you use, the mechanism is easy and intuitive. Simply nudge your thumb out-ward and OutBurst® handles it from there propelling your blade into an open and locked position. This pressing and nudging of the blade prevents accidental opening to put you (and your blade) in complete control of the situation.

**AUTOMATED LINER SAFETY**
Automated Liner Safety is the locking liner safety innovation taken to the next level. The Automated Liner Safety sets a pin between the locking liner and the frame. This pin acts as an additional layer of safety, so the locking liner is less likely to disengage during use. To close the knife, pull the red buttoned safety lever back, slide the locking liner over, and fold the blade into the closed position. Want one of the most secure safety systems on the market? The choice is automatic.

**CARSON FLIPPER**
Retired Master Sergeant and custom knife-maker Kit Carson defined this ingenious opener that challenged the conventional ways of opening a knife. With a simple finger pressure of the “flipper” incorporated into the blade, the blade flips open and locks, so you’re ready for action. Once open, the flipper works great as a blade guard as well. Look for the Carson Flipper featured on many of our tactical knives.
Our Designers

We’re honored to partner with the best custom knifemakers in the business to produce production versions of their custom designs. Many of them have been our friends for years, both in the office and out in the field. They make everything you’ve seen in these pages possible. Although CRKT® has picked up a few awards over the years, we think it’s important to give credit where credit is due. These designers have done more than come up with creative designs; they’ve helped all of us become more independent and self-reliant.

Jim Hammond
Birmingham, AL
Years Designing: 39+

Jim was the first knifemaker to work with CRKT® in 1994, but he had more than 17 years experience under his blade-decorated belt prior to that. After graduating from Clemson in 1977, he quickly climbed the ranks, specializing in military and collector grade tactical fighters like our FE™ series. A Knifemakers’ Guild member since 1978, his designs—and golf shots—are all about excellence, flair, and function.

Ed Halligan
Ocean Springs, MS
Years Designing: 40+

The second knifemaker to ever work with us, “Big Daddy K.I.S.S.” knew his way around CRKT® headquarters and a 747. After years using tools as an aircraft mechanic, Ed founded Halligan Knives in 1985. He went on to earn a Mastersmith rating from the American Bladesmithing Society and invented the often imitated, never duplicated, legendary, K.I.S.S.® (Keep it Super Simple) knife series. Ed passed in 2014. His immeasurable contribution to knife-craft is greatly celebrated… and deeply missed.

Pat & Wes Crawford
West Memphis, AR
Years Designing: 71+ combined

The Crawfords know what it’s like to combine old world traditions with new features. Pat, a Knifemakers’ Guild member since 1973, has been a pioneer in the combat folder genre, and was one of the first to use titanium and skeletonize his frames and handles. Wes, his son, has helped integrate exotic field materials including wood, ivory, and stag horn, into their offerings. They’re famous for the CRKT® Triumph N.E.C.K.™—and for pushing each other.

Russ Kommer
Fargo, ND
Years Designing: 19

To say Russ is an outdoorsman is a bit of an understatement. A professional fishing and hunting guide, he started making knives when one of his clients brought him a custom knife and dressed an entire moose—without sharpening it. Since then he’s made it his duty to build the kind of tools only he would use. It just so happens his Bear Claw’s™, and Hoist’N Lok™, are the kinds other hunters use as well.

Pat Carson
Vine Grove, KY
Years Designing: 40+

Kit retired as a ranking Master Sergeant and ultimately became a high profile member of the Knifemakers’ Guild. Kit designed the successful M16® knife series named one of the Top 10 Tactical Folders of the Decade by Blade Magazine. Inducted into the Cutlery Hall of Fame in 2012, Kit’s industry influence was felt far and wide. He even mentored such greats as Ken Onion. Kit passed in 2014. The Carson family requests that donations be made to the National Parkinson Foundation at Parkinson.org.

Ed Halligan
Ocean Springs, MS
Years Designing: 40+

Brian Tighe
Ridgeway, Ontario, CA
Years Designing: 26

There are edged tool artisans…and then there’s Brian Tighe. A Canadian Renaissance Man, he is practiced in the art of metallurgy, photography, and tool and die making. It’s what helped him make the leap from a creator of high-quality custom folding knives into the top 10 elite. We were honored to have his Buy Tighe™ blade as our limited edition CRKT® 20th anniversary knife and are releasing the new Tighe Breaker™ fixed blade knife for 2017.
If you’re going on a mission, Allen’s your man. An ex-recon marine and martial arts expert, he’s designed a wide range of innovative knives with a tactical emphasis. His award-winning blades have been featured in countless magazines and have been collected by heads of state and members of royal families. Allen has been responsible for successful CRKT® models like the Elishewitz FT:W.S.® and Tao® Tactical Pens.

Art meets science in the Martinez family. A noted sculptor and former student of R.C. Gorman, Michael specializes in large-scale bronze casting. His father, Baltazar, worked for the defense department for more than 30 years and taught Math for Engineering Design at MIT. Sadly, Baltazar has since passed. Together, they were like the yin and the yang of design, successfully combining form and function with great designs that live on in tribute like the CRKT® Ultima”.

Whenever Tom hears someone say, “It doesn’t take a rocket scientist to make a knife,” he’ll quickly correct them. After all, having been involved in the aerospace industry for more than 25 years, he brings a unique perspective to our tools using CAD software and rapid prototyping technology. It has resulted in multi-tools that are a rare combination of artistic form and function, such as the CRKT® Tool, Iota®, Paracord Survival Bracelets, and useful survival bracelet accessories.

Looking at the shelves in his shop, you’d almost think Ed specializes in awards rather than knives. But that just comes with the territory when you are pushing the limits with your designs. Just a few of his many highlights are; the A.G. Russell Most Innovative Folding Knife, Most High Tech Design-S.I.C.A.C, Best Fantasy Knife in the Ohio Valley Knife Show 2005, and Knife of the Year at the Blade Show 2004. Ed is living proof that if you love what you do, the rest comes easy.

You don’t want to mess with Sensei James Williams. Trust us. A former U.S. Army officer with more than 50 years of experience in the martial arts, he developed The System of Strategy. It’s a unique approach to unarmed combat that he teaches to Special Operations units and law enforcement worldwide. When he is armed, though, you’ll find him brandishing blades he’s created, like the Hisshou® and Hisatsu™ fixed blades, the Shizuka noh Ken”, and the now-legendary Hisatsu™ folder.

Simply put, A.G. Russell eats, sleeps and breathes knives. He was the first member of the Knife Digest Cutlery Hall of Fame, a founding member of the Knifemakers’ Guild, founded the Knife Collectors Club”, and started the first mail order knife business. Even with a pedigree like that, if you ask him what he enjoys most, he’ll still tell you it’s designing custom knives.

You're going on a mission, Allen’s your man. Art meets science in the Martinez family. Whenever Tom hears someone say, “It doesn’t take a rocket scientist to make a knife,” he’ll quickly correct them. After all, having been involved in the aerospace industry for more than 25 years, he brings a unique perspective to our tools using CAD software and rapid prototyping technology. It has resulted in multi-tools that are a rare combination of artistic form and function, such as the CRKT® Tool, Iota®, Paracord Survival Bracelets, and useful survival bracelet accessories.

Even with a pedigree like that, if you ask him what he enjoys most, he’ll still tell you it’s designing custom knives.
When it comes to knives, Alan knows all about giving back to the people. He climbed the ranks in college by entering knives in art shows. Since then he’s been adamant about teaching and passing on the skills of custom knife making to others. He specializes in one-of-a-kind fixed blades that have great ergonomics and sleek futuristic designs.

Knifemaking is in the Klecker genes. Glenn, an engineer with a passion for knife and tool design, knows how to use them firsthand, having led a marine detachment in Desert Storm. Meanwhile, his son Nathan helped build the wooden Nathan’s Knife Kit that teaches kids knife safety. Glenn’s innovative locking mechanism, dubbed the “Klecker Lock,” is featured on several CRKT production models, including the popular NIRK® Tighe and Graphite® knives.

If we didn’t know any better, we’d think the English definition of Mah is “practical.” After all, it’s a useful sensibility Liong incorporates into all of his designs, like the new G.S.D.™, the ever popular Eat’N Tool®, and the 2015 Mah-chete™. As a kid, where others doodled cartoons in their school notebooks, he drew knife designs. Later, having learned CAD, he was able to bring these ideas to life by collaborating with many of the top designers in the industry.

Ken is the real deal. The youngest ever inductee into the Blade Magazine Hall of Fame in 2008, he is recognized as one of the most innovative and successful knife designers of all time. In 1996 he created the first commercially successful assisted opening mechanism, and 20 years later unveiled his award-winning Field Strip Technology. Designer of the successful Eros™ folder series, as well as the award-winning Hi Jinx™, Ken never seems to be at a loss for ideas.

Some kids dream of being a ballplayer. Flavio wanted to be a knifemaker. In his adolescence, he worked on knives of the Japanese sword variety in his father’s shop. He has gone on to learn metallurgy, to work with Ken Onion, and to become a force for innovation. Flavio brought to market the revolutionary IKBS™ ball bearing pivot system (with Rick Lala), and evolved the classic locking liner with the ILS™ safety, exclusively available from CRKT® in the No Time Off™ knives.

Ray Kirk started forging knives in 1989. As an American Bladesmith Society Master Smith, he specializes in useful, simple designs that are beautiful in style. He’s won many awards, including three 1st Place awards at the ABS World Championship. Ray works with the KGA of Oklahoma and was presented the Bee Daniel Boone Award for preserving the art and history of the forged blade. Ray designed the K.E.R.T.™ tool that has become a popular multi-tool.

The fireplace is never without wood at the Johnson house. That’s because for years at RMJ Tactical, Ryan has been building some of the finest custom tomahawks this country has ever seen. Applying modern engineering to centuries-old tool and weapon concepts, he redefined the role of tomahawks in Law Enforcement and Special Forces Military Applications.

For as long as he can remember, Steve’s had a knife permanently attached to his hand. Growing up in Florida, he’d use it for hunting, fishing, scuba diving, spearfishing and underwater salvage. So it only made perfect sense that he’d start designing knives of his own, many of which earned him nice trophies like the Best Folder of Show award at the very first Florida Invitational Knife Show.

What happens when you cross art and mechanics? You get something that looks like Matthew Lerch. Trained initially as a jeweler/watchmaker, he progressed into manufacturing and tool making. Now he has a few patents under his belt for innovations, like the Fire Safe®, and has been honored with some prestigious awards including the Buster Warenski award. Matt views knives as functional art, as evidenced in his Moxie™ and Blade Show award-winning Endorser™ design.
Ken Steigerwalt
Orangeville, PA
Years Designing: 35

Ever since he was a kid, if Ken needed a knife, he just made one. His first one was built from a saw blade at the kitchen table using a vise, files, and sandpaper. Needless to say, he’s gone on to create more highly designed knives that have won him 11 Blade Show awards in seven consecutive years, including two Best Folders awards and one Best Folder of the Year. He also co-designed the patented Fire Safe® safety innovation, which is used on many CRKT® blades.

Lucas Burnley
Albuquerque, NM
Years Designing: 12

When you ask Lucas what drew him to the knife world as a teenager, he’ll tell you it was stories of survival, off-path adventures with his father, and a healthy dose of action movies. Over the years, he has experimented with a broad range of styles to artfully combine classical examples with modern materials and techniques, such as with his Obake® knife. Lucas believes knives are a personal expression of independence. We couldn’t agree more.

Karen Hood
Coeur d’Alene, ID
Years Designing: 15

If you’re stuck in the wilderness, you want to run into Karen. With her experience in bushcraft, jungle, and urban survival, chances are good she’d save your bacon. As owner of Survival.com and the publisher and Editor-In-Chief of Survival Quarterly Magazine, she and her late husband, survival expert Ron Hood, created more than 30 award-winning survival videos that are widely considered to be the finest wilderness training aids in the world. Karen used everything she learned in the development of her CRKT® survival knife the KHC® Karen Hood Chopper.

Terry Renner
Palmetto, FL
Years Designing: 26+

Terry likes tinkering with things—designs, tooling, and fixtures for road and mountain bikes, and of course, blades. A mechanical designer and artist at heart, he worked in the bicycle industry for thirty years. He always had a fascination with edged objects and moonlighted with fabricating new and different locking mechanisms for folding knives. In 2006 he went to full-time knifemaker status and was awarded Best New Knifemaker at the Blade Show. Terry’s a current member and a former three-term President of the Florida Knifemakers’ Association.

Abe Elias
Leamington, Ontario, CA
Years Designing: 12+

Abe knows a thing or two about power. Whether it’s a V-8 engine he worked on as an autoworker or a well-crafted knife that will cut through anything, he developed a love of steel at a young age. Abe got his first knife at the age of six as a gift from an uncle and it spurred him on to become a collector by the age of ten, buying knives with his paper route money. Having designed and made knives since 2003, Abe’s passion for the craft is evident in his Saker™ Bushcraft knife, not to mention all the articles he edits and writes for Knives Illustrated, Knife World and Blade Magazine.

Larry Fischer
Boise, ID
Years Designing: First Year

An avid traditional bowhunter, outdoorsman, and conservationist, Larry’s no nonsense approach to all he endeavored was readily apparent in everything he did. Larry served on the National Board of Directors for Backcountry Hunters and Anglers, was a lifetime member and past president of the Professional Bowhunters Society, and was an active member of Traditional Bowhunters of Montana and Traditional Archers of Oregon. Larry lost his courageous battle with cancer before his first design, the Hunt’N Fisch™ made it to market.

Bob Terzuola
Albuquerque, NM
Years Designing: 31+

Look up “tactical folding knife” in the dictionary and you’re likely to see Bob’s picture next to it. After all, he virtually invented the category and continues to specialize in knives for professional use, like the BT-70™. Born in New York, he had many adventures before settling into design in the early ‘80s. In 1981 he joined the Knifemakers’ Guild and that was all she wrote.

Hans Florine
Lafayette, CA
Years Designing: 3+

Hans has been climbing for over 32 years and is the world-record holding speed climber of The Nose on Yosemite’s El Capitan. So he knows the importance of making every ounce and handhold count. That’s why he designed blades like the NIAD,™ that can carry their own light weight on a climb and tools that open with one hand. Because when you’re on a 5.13 or in a remote camp, you don’t want the equipment you’re holding onto holding you back.

Tom Krein
Gentry, AR
Years Designing: 21

“Form follows function” is more than just a saying for Tom. It’s a philosophy that guides every knife and design decision he makes. After all, having been an ER nurse and later working as a knifemaker he knows what works. Blending art with handcrafted steel, he creates tools that get used often. Whether it’s cleaning a freshly landed trout with his Mossback™ knife or dicing up vegetables from the garden outside his shop that’s free to the public.
Jesper Voxnaes  
Loegestrup, Denmark  
Years Designing: 25

When Jesper needs to test a design, he only has to step into his own backyard. The harsh elements and conditions of the fjords and forests in his native Denmark do the rest. When he was starting out, no one was making the kind of knives he wanted to design so he learned by trial and error. Apparently his efforts paid off given his IF Award in 2013 for one of the Top European Designs. Now he creates and uses knives like the Amicus™ as he sails, camps, and drives off-road. Which is more often than not.

Darrin William Sirois  
Fayetteville, NC  
Years Designing: 7

Coming from a Special Ops background, Darrin doesn’t design knives that just work in theory. They need work in action too. And he knows the missing element to any great blade: human input. That’s why you’ll often find him hounding his Special Operations teammates and asking them what they like and don’t like about their knives. Now as part of the Forged by War™ program he’s fine-tuning until his knifemaking mission is complete. Along the way, he’s earning nods from awards shows and fellow soldiers all around the world.

Michael R. Rodriguez  
Fayetteville, NC  
Years Designing: 5

Michael R. Rodriguez was one of only two Americans to graduate the Irish Army Ranger Wing Sniper Course, and he’s a Chief Ambassador for the Green Beret Foundation. Truly, if we attempted to list the rest of his accolades, we’d run out of ink. His experience as a combat veteran pivoted when he met Ryan Johnson of RMJ Tactical during a recovery period. Then, forging knives and tools became a passion project for him—one that is starkly reflected in his products that we are proud to represent in our Forged By War™ program.

Pat Cascio  
Lebanon, OR  
Years Designing: 30

If you’re an enemy, you probably don’t want to run into Pat—or one of his combat knives—in a dark alley. After all with a 6th degree black belt, he knows how to defend himself—quickly. This veteran of martial arts for over 35 years doesn’t pull any punches when it comes to fighting knives. If he doesn’t think a blade will work for him, he doesn’t think it’ll work for anyone. Thankfully he found a knife that’s up to his high standards—the OC3™. He just had to design it himself.

Kelly Rodriguez  
Fayetteville, NC  
Years Designing: 2

If there’s ever a Soldier that’s felt like there’s someone looking out, there’s a good chance that someone is Kelly. As an active duty soldier and field medic for the Army for over 20 years, Kelly brings raw talent to the Forged By War™ program. She designed the CST™ because dedicating years of service in the field wasn’t enough—she’s continuing the legacy from the homefront. She doesn’t just stop at that, though, she’s preparing to work with organizations that focus on female veterans’ issues after her upcoming retirement.

Elmer Roush  
Brasstown, NC  
Years Designing: 40

Elmer has spent his fair share of time on the battlefield. But these days, what really gives him excitement is battling hot steel with a hammer as a blacksmith. He enjoys hand forging functional edged tools and brings over 40 years of experience to the Forged By War™ program. Axes, froes, hatchets, and historical replicas, such as Viking axes, are his specialty. Though his designs look modern, they’re actually based on tools and implements that go back thousands of years.

Austin McGlaun  
Columbus, GA  
Years Designing: 14

There are those who fight with knives. There are others who design them. And then...there’s Austin. Having served in the 101st Airborne Division in Iraq, and as a street cop in Columbus, GA, he knows that a knife has to work as both a weapon and a tool. As part of the Forged By War™ program he applied his skills as both a combat vet and knifemaker to develop the Clever Girl™. Not to mention a new way to bring his fellow soldiers home. When asked about his design philosophy, he’ll tell you that if a knife is ugly but effective, it’s not ugly. It’s perfect.

Philip Booth  
Ithaca, MI  
Years Designing: 27

Philip Booth is a modern day version of a human phoenix—when his art studio burned down in the late 80’s, it left his life’s work of paintings and art prints reduced to ashes. Instead of letting it knock him down, he was reborn as a knifemaker, and has since swept up a handful of prestigious awards like the Blade Show’s Most Innovative Design award, and their 2005 Best of the Rest award. He’s a mechanically orientated artist, and his innovative, artful tools are proof.
One fateful day in 2005, he walked into Ken Onion’s shop in Kaneohe, Hawaii, and never left. Well, that’s not entirely true, but he’s certainly made an impact on the world-class knife maker and has learned a thing or two along the way. Jeff Park is a detail-oriented type of guy, and by that we mean he’s an absolute perfectionist, and it shows in his simple, yet flawless designs. He’s an artist in the most fundamental respect: form follows function, and his knives reflect a remarkable understanding of both.

Jeff Park
Mililani, HI
Years Designing: 2

Practically born a woodworker, Larry Hanks’ talents flowed into jewelry design and foundry work, and culminated in a decorated career as a tattoo artist. Then he met Ken Onion. Larry’s knife engraving was so skilled that Ken Onion enlisted his talents shortly after they met, and now they’ve been working together for over 20 years. It wasn’t until four short years ago that Larry took on his own projects. The progression was natural, and there’s no doubt around here that his knifemaking career will soon eclipse his tattooing career.

HOMEFRONT™
Designed by Ken Onion in Kaneohe, Hawaii

It might look like your grandpa’s classic WWI folder, but it’s got an impressive secret. The new Homefront™ knife is the first in our fleet to feature “Field Strip” technology. This in-field, no-tool take apart capability lets you purge your most reliable companion of a hard day’s grime right where you are, without ever returning to your workbench.

• Breakthrough “Field Strip” Technology Innovation
• Field Strip lets you easily disassemble your knife for cleaning without tools
• AUS 8 Blade Steel w/6061 Aluminum Handles

FULL SPECS ON P45

K250KXP

HOMEFRONT™ EDC
Designed by Ken Onion in Kaneohe, Hawaii

It’ll stand the front line during a coordinated assault on your to-do list. The Homefront EDC is among the first in our fleet to feature “Field Strip” technology. This technology allows you to clean and restore your knife to perfect working order without tools, right where you stand so you don’t skip a beat.

• Breakthrough “Field Strip” Technology Innovation
• Field Strip lets you easily disassemble your knife for cleaning without tools
• 1.4116 Blade Steel + Glass Reinforced Nylon Handles

K340KXP & K345KKS

**GUSSET™**
Designed by Ken Onion in Kaneohe, Hawaii

*For a decorated knife designer, inspiration strikes anywhere. Like in a dune buggy.* This original Ken Onion design is ideal for those looking for a reliable everyday carry with a little something extra. The gussets of a metal dune buggy frame add strength and reduce weight—the Gusset™ by Ken Onion is extremely lightweight and earns serious style points.

FULL SPECS ON P.46

K340KXP

Available in Black with Triple Point™ Serrations as K345KKS

K330GGP & K330KKS

**BOMBASTIC™**
Designed by Ken Onion in Kaneohe, Hawaii

*This one's not the type to let bygones be bygones.* Classic vintage styling. Textures and contrast from WWII. The Bombastic™ isn’t your average everyday carry folder, it’s a show-stopping classic piece with ahead-of-the-curve styling and capability.

FULL SPECS ON P.45

K340KXP

Available in Black with Triple Point™ Serrations as K330KKS
**CARNUFEX™**
Designed by Flavio Ikoma in Presidente Prudente, Brazil

*Make mincemeat of your daily tasks—dino style.* The Carnufex™ everyday carry folder is modeled after a keystone dinosaur predator—and for good reason. The form influences function for this attractive, shapely folder, and tears apart anything that gets in its way.

- Flipper Opening
- IKBS™ Ball Bearing Pivot System
- Stainless Steel Stonewash Handle w/Glass Reinforced Nylon Inlay

FULL SPECS ON P49

---

**HI JINX™ Z**
Designed by Ken Onion in Kaneohe, Hawaii

*As classy and capable as James Bond himself.* The Hi Jinx™ Z is a gentleman's beast of burden everyday carry blade with all the classical curves and subtle elegance that has become the anthem of Ken Onion knife design. It’s as comfortable in Sunday church as it is on your workbench, and will hurry headlong into any task that stands in your way.

- IKBS™ Ball Bearing Pivot System
- Satin Finish
- Locking Liner

**PINEAPPLE**
Designed by Matthew Lerch in Sussex, Wisconsin

It’ll open fast and deliver its full potential in a hurry. This everyday carry folder is a big punch in a compact package. No matter what tasks you throw it into, the patterned handle design ensures that you’ll have a confident grip, and feel like a badass WWII combat vet while you’re at it.

- Flipper Opening
- Stonewash Finish
- Pineapple Inspired Hand Grenade Design

FULL SPECS ON P.59

1200

**AUX™**
Designed by Lucas Burnley in Albuquerque, New Mexico

Your EDC says a lot about you…this one says, “I’m here to get ‘er done.” The Aux™ everyday carry knife is tactically inspired, but most at home taking down daily duties. Don’t underestimate its appearance though—it’s understated when you don’t need it and comes out strong when you do.

- Satin Finish
- Textured Polypropylene Handles
- Glass Reinforced Nylon Sheath

FULL SPECS ON P.55
New 2017

5441

**AMICUS™ COMPACT**
Designed by Jesper Voxnaes in Loegstrup, Denmark

*Great Grandpa Bjorn would’ve loved it. Then again, he loved pillaging too.* Introducing the Amicus™ folding outdoor knife. It was designed in the great Viking tradition. So you know it can stand up to your outdoor pursuits, wherever your boat or feet take you.

- Thumb Slot Blade Deployment
- Two-Tone Handle - Stainless Steel and Tough G10
- Frame Lock

FULL SPECS ON P.54

---

1220 & 1221K

**AUX™ FOLDER**
Designed by Lucas Burnley in Albuquerque, New Mexico

*The Aux™ Folders are here to run sweep.* Lucas Burnley designed the original fixed blade Aux™ to be your “Auxiliary” knife to your primary carry, and the folder to pick up the slack. The luxury of variety is always close at hand with this tactically-inspired everyday carry. Don’t underestimate its appearance though—it’s understated when you don’t need it and comes out strong when you do.

FULL SPECS ON P.55-56

---

Available with Triple Point™ Serrations as 1221K
**BITA™**
Designed by Jesper Voxnaes in Loegstrup, Denmark

The stealthy Bita™ does little to mirror its Viking heritage; though a pillaging Viking would undoubtedly take it everywhere. Covert in its sheath, but mighty in-hand, the Bita™ is an adventure-inspired everyday carry knife. Clean lines and simplicity are obvious at first glance. But the powerful functionality of this 1.9” fixed blade lurks under the radar until the moment it’s needed.

FULL SPECS ON P.53

---

**VIZZLE™**
Designed by Jesper Voxnaes in Loegstrup, Denmark

Rough yet refined. Just like you. The stylish Vizzle™ everyday carry folder looks like it belongs in a speakeasy, but the long, sleek blade shape won’t hesitate when it’s time to get down to business. So minimal, it’s as at home in your pocket as your money clip, and it’s just as useful.

- IKBS™ Ball Bearing Pivot System
- Satin Finish
- Stonewash Handle Finish

FULL SPECS ON P.53
**NEW 2017**

**5311**

**PILAR™**
Designed by Jesper Voxnaes in Loegstrup, Denmark

Where minimal design meets maximum utility. The Pilar™ is a super compact everyday carry folder with distinctive minimalist design and an epic tale behind its name. It’s low profile and understated when tucked away, and carefully designed to punch above its weight when in use.

- Thumb Slot Blade Deployment
- Satin Finish
- Bead Blast Handle Finish

FULL SPECS ON P.54

---

**6130**

**JETTISON™**
Designed by Robert Carter in Hillister, Texas

A sleek and powerful knife with a mighty heritage. The designer of the Jettison™ comes from a long line of knife craftsmen. With a razor-sharp blade and frame lock, this everyday carry knife stands up to its lineage, and stands apart in a new league of its own.

- Frame Lock
- Modified Sheepsfoot Blade
- Stonewash Handle Finish

FULL SPECS ON P.61
5102N & 5112N
SNAP LOCK™
Designed by Ed Van Hoy in Abingdon, Virginia

One of the most decorated knives of all time is back. The Snap Lock™ held the knife world in rapture when it won the Most Innovative Knife Award at the 2004 Blade Show. We’re breathing new life into this unique everyday carry folder and bringing back the 180° swing opening. If you think that it might be all show and no substance, spend a mere minute with it and you’ll do a 180° swing yourself.

- Innovative Snap Lock™ Mechanism
- Bead Blast Finish
- Quick Release Paracord Lanyard

FULL SPECS ON P66-67

Also available with Triple Point™ Serrations as 5112N

2784
DESTA™
Designed by Pat Crawford in West Memphis, Arkansas

Two simple components designed to take on every last task. This compact everyday carry folder is as sleek and simple as they come, but features an ahead-of-the-curve forward lockback folding mechanism—the tighter you grip it, the tighter it locks into place. Leave no daily duty left undone with the Desta™.

- Forward Lock Back Safety
- Black Stonewash Finish
- Thumb Slot Blade Deployment

FULL SPECS ON P62
SNICKER™
Designed by Philip Booth in Ithaca, Michigan

In the face of daily duties, the Snicker™ always has the last laugh. It’s one of the most compact everyday carry folders out there that still performs with the punch of a full-size blade. This folder is proof that skipping the bulk doesn’t mean skimping on performance.

• Flipper Opener
• Locking Liner for Safety
• Glass Reinforced Nylon Handles with Carbon Fiber Texture

FULL SPECS ON P.67

CROSSBONES
Designed by Jeff Park in Mililani, Hawaii

Thinner, lighter, universal. The Crossbones is an extremely versatile everyday carry knife for cutting meat, opening envelopes, and everything in between. Designed under the tutelage of master designer Ken Onion, it holds up to high standards while reflecting a fresh, new design and function. The Crossbones practically disappears when you slide it into your pocket, but it’ll come out ready to face any task at hand.

• Low Profile Flipper Opening
• Satin Finish
• Brushed Aluminum Two-Tone Handle

FULL SPECS ON P.49
REMEDY™
Designed by Liong Mah in Palm Bay, Florida

The Remedy™ exists at the intersection of art and practicality. This aesthetically flawless everyday carry is modeled after a traditional Finnish Puukko knife, and honors its legacy with the simple looks and versatile utility. It’s the choice folder for those looking to end daily tasks and turn heads while they’re at it.

• Flipper Opening
• Satin Finish
• IKBS™ Ball Bearing Pivot System

FULL SPECS ON P.62

M21-10KSF

M21™ - 10KSF WITH TRIPLE POINT™ SERRATIONS
Designed by Kit Carson in Vine Grove, Kentucky

One of the most beloved everyday carry folders ever made now features a deep-bellied spear point blade. The M21™ stainless steel everyday carry series comes from a long line of military grade tools. Now you can conquer civilian tasks with this proven knife design platform made simple, tough, and affordable. If you are a fan of the Kit Carson designed M21™ tactical folding knives you’ll want to check out this deep-bellied everyday carry knife variation.

• Frame Lock w/Dual Hilt
• Triple Point™ Serrations
• Black Oxide Blade Finish

FULL SPECS ON P.72
2732
WOODS NOBO™ T-HAWK
Designed by Ryan Johnson of RMJ Tactical in Chattanooga, Tennessee

Build a Nice Log Cabin Fire. Heck, Build a Nice Log Cabin Home. This traditionally-modeled two-handed camp axe with a hickory handle and hot forged blade, will make your life easier when you’re off the grid.

FULL SPECS ON P.78

5453 & 5451
BATUM™
Designed by Jesper Voxnaes in Loegstrup, Denmark

You’re not interested in the path of least resistance. Neither is this knife. The Batum™ everyday carry folder is the knife equivalent of a 4x4. It’s the go-anywhere, do-anything burly backwoods go-to. The stout blade shape pairs with the ergonomic handle to make a companion that won’t back down to any camp task.

FULL SPECS ON P.79
SURVIVAL
2061

**TSR™ TERZUOLA SURVIVAL RESCUE KNIFE**
Designed by Bob Terzuola in Albuquerque, New Mexico

*A survivalist’s best friend, Mother Nature’s worst enemy.* The TSR™ (Terzuola Survival Rescue) fixed blade outdoor knife doesn’t just stop at that—it’s handle comes with a powerful secret...in the form of an entire survival kit. Even though a skilled survivalist could fashion just about everything they would need from woody resources, sometimes a magnesium edge, a reflective stainless steel plate, and paracord can make a Darwinian difference.

- Satin finish blade w/hole for wrapping paracord and attaching a wooden spear
- Fishing line, fishing hooks, additional paracord included
- Sheath w/ceramic sharpening edge, magnesium edge, and a reflective stainless steel signal plate

FULL SPECS ON P.82

3515

**KHC™ KAREN HOOD CHOPPER**
Designed by Karen Hood in Coeur d’Alene, Idaho

*Dare back it into a woody snarl, and it’ll come out prime to thrash.* The KHC™ Karen Hood Chopper is a fixed blade survival knife designed to take down trees without adding to the girth of your pack. It rides low profile in its sheath considering its substantial 9” blade and punches above its weight. The handles are removable and can be replaced with paracord—becoming a major threat to any job the wilderness serves up.

- Corrosion Resistant Powder Coated Blade
- Tough Resin Infused Fiber Handle
- High Quality Reinforced Nylon Sheath

FULL SPECS ON P83
K916KKP

CHANCEINHELL™ MACHETE 16”
Designed by Ken Onion in Kaneohe, Hawaii

There are knives you see on survival shows. Then there’s the real deal. With an even bigger blade than the original, a comfortable handle, and reinforced nylon sheath, this is the survival machete to use when the only thing you’ll be cutting to is your destination.

FULL SPECS ON P83

K918KKP

CHANCEINHELL™ MACHETE 18”
Designed by Ken Onion in Kaneohe, Hawaii

One blade to rule them all. You couldn’t bring yourself to believe there could be a bigger machete than the original. Then we brought the 16” blade. Now, say hello to your not so little friend. A full 18” slab of steel that comes with the same comfortable handle, and reinforced nylon sheath as the original, this is the survival machete to use when the only thing you’ll be cutting to is your destination.

FULL SPECS ON P84
K265CXP

HOMEFRONT™ HUNTER
Designed by Ken Onion in Kaneohe, Hawaii

It might look like Daniel Boone’s classic hunting folder, but it’s got an impressive secret. The Homefront™ Hunter is among the first in our fleet to feature “Field Strip” technology. This in-field, no-tool take apart capability lets you purge your most reliable companion of whatever mud, blood, or grit you may encounter right where you are, without having to step foot back in civilization.

FULL SPECS ON P.74
K110KKP
HUMDINGER™
Designed by Ken Onion in Kaneohe, Hawaii

As imperative as your rifle, as useful as your compass. World-class knife designer Ken Onion is at it again, and this time with a no-frills, fixed-blade hunting companion. Its big-belly, carbon steel construction is as burly as the Alaskan backcountry, and as impressive as the grizzly you’ll be skinning.

FULL SPECS ON P.74

• 65 Mn Carbon Steel Blade
• Black Corrosion Resistant Blade Finish
• Versatile Utility Sheath

2815 & 2814
NOMA™
Designed by Jesper Voxnaes in Loegstrup, Denmark

This backwoods field dresser doesn’t come with a butcher block. The Noma™ is a folding knife rooted in its Scandinavian hunting heritage and is the envy of butchers everywhere. Its big-belly blade design and burly, ergonomic shape makes it a go-to if you’re going after big game.

FULL SPECS ON P.74

• Nail Nick Opening
• Classic Lock Back Design
2839

BLACK FORK™ HUNTING KNIFE SET
Designed by Tom Krein in Gentry, Arkansas

A three-piece set designed to break down your 8-point buck. Here’s where the fun really starts. This fixed-blade hunter’s knife set is everything you need to field dress your game and get it home. This set of three features a caping knife, a skinning knife, and a gut hook knife that roll away into a remarkably lightweight package. Pack them in, so you can pack your trophy out.

FULL SPECS ON P.75

2393H Orange

2393K Black

P.D.K. PRECISION DISPOSABLE KIT

As sharp as your shot. Throw the lightweight P.D.K. (Precision Disposable Kit) into your hunting pack and forget about it—until you drop that 8 pointer. This set of disposable utility hunting razor blades features four (#60) blades with protective sleeves. Each has an ABS plastic handle with an ergonomic and comfortable grip. If one starts to dull, simply toss it in the trash. The kit also comes with a pair of black nitrile disposable gloves.

• Disposable Hunting Knife Kit
• Four #60 Utility Blades w/Protective Sleeves
• One Pair of Black Nitrile Gloves

FULL SPECS ON P.77

2393H & 2393K

*Packaging mock-up for site model purposes, may be subject to change.
**RAKKASAN™**
Designed by Austin McGlaun in Columbus, Georgia

For America's fiercest warriors, only the strongest, most capable tool will do. This tactical fixed blade was designed by a war vet for his brothers and sisters who are still abroad. It's got the capability of a utility knife, and the powerful force of a last-resort defense tool. When you only have room for one, the Rakkasan™ delivers.

FULL SPECS ON P.89

---

**TECPATL™**
Designed by Michael R. Rodriguez in Fayetteville, North Carolina

Anyone can throw a punch. Not everyone can make it count when it's a last resort. The Tecpatl™ fixed blade push dagger was designed by a combat veteran that wished it had existed while he was serving overseas. So ergonomically thoughtful, in the heat of the moment, it's hard to tell where your anatomy ends and the blade begins.

FULL SPECS ON P.88

---

**CST COMBAT STRIPPING TOOL**
Designed by Kelly Rodriguez in Fayetteville, North Carolina

Even heroes need someone looking out for them. This one is for them. The idea for the Combat Stripping Tool (CST) was born during a deployment as a combat medic assigned to a Forward Surgical Team in Northern Afghanistan. During intense life-and-death situations, sometimes trauma shears simply wouldn't get the job done, so Kelly L. Rodriguez designed this utility blade to pick up the slack. When everything is on the line, the CST is there to take control.

• Stainless Steel Handles
• Thumb Jimping on Blade for Optimum Cutting Control

6480
Blade: Length: 2.625\" (66.6 mm)
Edge: Plain
Steel: 8Cr13MoV
Finish: Dark Gray Titanium Nitride
Thickness: 0.100\" (2.5 mm)
Closed: 3.750\" (95.2 mm)
Open: 6.500\" (165.1 mm)
Weight: 3.1 oz. (87.9 g)
Handle: Stainless Steel
Style: Folding Knife w/Frame Lock

• Dark Gray Titanium Nitride Blade Finish
• Stainless Steel Handles
• Thumb Jimping on Blade for Optimum Cutting Control

6480K
Blade: Length: 2.625\" (66.6 mm)
Edge: Plain
Steel: 8Cr13MoV
Finish: Black Titanium Nitride
Thickness: 0.100\" (2.5 mm)
Closed: 3.750\" (95.2 mm)
Open: 6.500\" (165.1 mm)
Weight: 3.1 oz. (87.9 g)
Handle: Stainless Steel
Style: Folding Knife w/Frame Lock

• Black Titanium Nitride Blade Finish
• Stainless Steel Handles

PAZODA™ WITH TRIPLE POINT™ SERRATIONS

- Dark Gray Titanium Nitride Blade Finish
- Stainless Steel Handles
- Triple Point™ Serrations

PAZODA™ BLACK WITH TRIPLE POINT™ SERRATIONS

- Black Titanium Nitride Blade Finish
- Stainless Steel Handles
- Triple Point™ Serrations

DEVIAITION™
Designed by Terry Renner in Palmetto, Florida

- IKBS™ Ball Bearing Pivot System
- Dual Blade Finish—Mirror and Satin
- Distinctive, Futuristic Blade Design

SNAP LOCK™
Designed by Ed Van Hoy in Abingdon, Virginia

- Innovative Snap Lock™ Mechanism
- Bead Blast Finish
- Quick Release Paracord Lanyard

NEW

6490
Blade: Length: 2.625" (66.6 mm)
Edge: Combination
Steel: 8Cr13MoV
Finish: Dark Gray Titanium Nitride
Thickness: 0.100" (2.5 mm)
Closed: 3.750" (95.2 mm)
Open: 6.500" (165.1 mm)
Weight: 3.1 oz (87.9 g)
Handle: Stainless Steel
Style: Folding Knife w/Frame Lock

Available in Clam Pack as 6490C

6490K
Blade: Length: 2.625" (66.6 mm)
Edge: Combination
Steel: 8Cr13MoV
Finish: Black Titanium Nitride
Thickness: 0.100" (2.5 mm)
Closed: 3.750" (95.2 mm)
Open: 6.500" (165.1 mm)
Weight: 3.1 oz (87.9 g)
Handle: Stainless Steel
Style: Folding Knife w/Frame Lock

2392
Blade: Length: 3.100" (78.7 mm)
Edge: Plain
Steel: 8Cr14MoV
Finish: Two-Tone
Thickness: 0.120" (3.1 mm)
Closed: 4.540" (115.3 mm)
Open: 7.630" (193.8 mm)
Weight: 6.0 oz (170.0 g)
Handle: Stainless Steel w/Ti-Nitride Finish
Style: Folding Knife w/Locking Liner

5102N
Blade: Length: 2.554" (64.8 mm)
Edge: Plain
Steel: 420J2
Finish: Bead Blast
Thickness: 0.124" (3.1 mm)
Closed: 4.207" (106.8 mm)
Open: 6.25" (158.3 mm)
Weight: 2.5 oz (70.8 g)
Handle: 420J2
Style: Folding Knife w/Snap Lock

Designed by Kit Carson in Vine Grove, Kentucky

- Automated Liner Safety
- Triple Point™ Serrations
- Glass-Reinforced Nylon Handles

**M16® - 10Z TANTO WITH TRIPLE POINT™ SERRATIONS**
Designed by Kit Carson in Vine Grove, Kentucky

- Automated Liner Safety
- Triple Point™ Serrations
- Glass-Reinforced Nylon Handles

**M16® - 10KZ TANTO BLACK WITH TRIPLE POINT™ SERRATIONS**
Designed by Kit Carson in Vine Grove, Kentucky

- Automated Liner Safety
- Triple Point™ Serrations
- Black Corrosion Resistant EDP Coating

**M16® - 01S SPEAR POINT STAINLESS STEEL HANDLE**
Designed by Kit Carson in Vine Grove, Kentucky

- Frame Lock
- Stainless Steel Handles
- Carson Flipper Opening

---

**M16-01KZ**
Blade: Length: 3.125" (79.3 mm)
Edge: Combination
Steel: 8Cr14MoV
Finish: Black EDP Coating
Thickness: 0.080" (2.0 mm)
Closed: 4.000" (101.6 mm)
Open: 7.125" (180.9 mm)
Weight: 2.3 oz. (87.9 g)
Handle: Glass-Reinforced Nylon
Style: Folding Knife w/Locking Liner

U.S. Patent No. 7,437,822
Available in Clam Pack as M16-01KZC

**M16-01Z**
Blade: Length: 3.000" (76.2 mm)
Edge: Combination
Steel: 8Cr14MoV
Finish: Bead Blast
Thickness: 0.080" (2.0 mm)
Closed: 4.000" (101.6 mm)
Open: 7.125" (180.9 mm)
Weight: 2.3 oz. (87.9 g)
Handle: Glass-Reinforced Nylon
Style: Folding Knife w/Locking Liner

U.S. Patent No. 7,437,822

**M16-10KZ**
Blade: Length: 3.000" (76.2 mm)
Edge: Combination
Steel: 8Cr14MoV
Finish: Black EDP Coating
Thickness: 0.080" (2.0 mm)
Closed: 4.000" (101.6 mm)
Open: 7.125" (180.9 mm)
Weight: 2.3 oz. (87.9 g)
Handle: Glass-Reinforced Nylon
Style: Folding Knife w/Locking Liner

U.S. Patent No. 7,437,822
Available in Clam Pack as M16-10KZC

**M16-01S**
Blade: Length: 3.060" (77.7 mm)
Edge: Plain
Steel: 8Cr13MoV
Finish: Bead Blast
Thickness: 0.098" (2.4 mm)
Closed: 4.000" (101.6 mm)
Open: 7.130" (181.1 mm)
Weight: 2.6 oz. (73.7 g)
Handle: Stainless Steel
Style: Folding Knife w/Frame Lock

Available in Clam Pack as M16-01SC
**M16® - 01KS SPEAR POINT BLACK STAINLESS STEEL HANDLE**

Designed by Kit Carson in Vine Grove, Kentucky

- Frame Lock
- Stainless Steel Handles
- Black Corrosion Resistant EDP Coating

**M16® - 01S TANTO WITH TRIPLE POINT™ SERRATIONS STAINLESS STEEL HANDLE**

Designed by Kit Carson in Vine Grove, Kentucky

- Frame Lock
- Stainless Steel Handles
- Triple Point™ Serrations

**M16® - 10KS TANTO BLACK WITH TRIPLE POINT™ SERRATIONS STAINLESS STEEL HANDLE**

Designed by Kit Carson in Vine Grove, Kentucky

- Frame Lock
- Triple Point™ Serrations
- Black Corrosion Resistant EDP Coating

**M16® - 10KS TANTO BLACK WITH TRIPLE POINT™ SERRATIONS STAINLESS STEEL HANDLE**

Designed by Kit Carson in Vine Grove, Kentucky

- Frame Lock w/Dual Hilt
- Triple Point™ Serrations
- Black Corrosion Resistant EDP Coating

**K265CXP**  
Blade: Length: 3.539” (89.8 mm)  
Edge: Plain  
Steel: 1.4116 SS  
Finish: Satin  
Thickness: 0.135” (3.4 mm)  
Closed: 4.720” (119.8 mm)  
Open: 8.25” (209.5 mm)  
Weight: 4.3 oz. (122 g)  
Handle: Glass Reinforced Nylon  
Style: Folding Knife w/Locking Liner

---

**K110KKP**  
Blade: Length: 5.973” (151.7 mm)  
Edge: Plain  
Steel: 65Mn Carbon Steel  
Finish: Black Corrosion Resistant  
Thickness: 0.180” (4.5 mm)  
Overall: 11.438” (290.5 mm)  
Weight: 9.4 oz (266.4 g)  
Handle: Thermoplastic Polyurethane (TPU)  
Style: Fixed Blade Knife w/Sheath  
Sheath: Material: Polypropylene  
Weight: 5.7 oz (161.5 g)

---

**2814**  
Blade: Length: 2.760” (70.1 mm)  
Edge: Plain  
Steel: 8Cr13MoV  
Finish: Satin  
Thickness: 0.104” (2.6 mm)  
Closed: 3.757” (95.4 mm)  
Open: 6.563” (166.7 mm)  
Weight: 3.2 oz (90.7 g)  
Handle: Glass Reinforce Fiber Polyamide  
Style: Folding Knife w/Lock Back Safety

---

**2815**  
Blade: Length: 3.317” (84.2 mm)  
Edge: Plain  
Steel: 8Cr13MoV  
Finish: Satin  
Thickness: 0.110” (2.7 mm)  
Closed: 4.497” (114.2 mm)  
Open: 7.875” (200.0 mm)  
Weight: 4.6 oz (130.4 g)  
Handle: Glass Reinforce Fiber Polyamide  
Style: Folding Knife w/Lock Back Safety
**HOIST’N LOK® TREE STAND HOIST**

Designed by Russ Kommer in Fargo, North Dakota

- Innovative, Patented, Secure, Cam Lock
- Includes: Pulley, Extension Arm
- Strap, Ratchet, and Rope

---

**HOIST'N LOK® BIG GAME HOIST**

Designed by Russ Kommer in Fargo, North Dakota

- Innovative, Patented, Secure, Cam Lock
- 4:1 Mechanical Pulley System
- Includes: Pulley, Gambrel, Rope

---

**BLACK FORK™ HUNTING KNIFE SET**

Designed by Tom Krein in Gentry, Arkansas

- 3 Knife Hunting Kit
- Stainless Steel Fixed Blades
- Woven Polyester Sheath

---

**HOIST1**

Specs: 1·6061 Aluminum Lobed Pulley Wheel
CNC Machined Knurling on Pulley Wheel
3 POM Plastic Pulley Wheels

Pulley Housing:
- Length: 7.5" (19.0 cm)
- Width: 2.2" (5.6 cm)
- Depth: 1.8" (4.6 cm)

Gambrel:
- Length: 25.0" (19.1 cm)
- Height: 6.38" (16.3 cm)
- Rod Diameter: .39" (0.95 cm)

Weight: Pulley & Carabiner: 1 lb. 8 oz. (680.4 g)
Capacity: 100 lbs. (45.3 kg)
Includes: 2 Carabiners
40 ft. (12.2 m) of 8mm Rope

U.S. Patent No. 8,596,615

---

**HOIST2**

Specs: 1·6061 Aluminum Lobed Pulley Wheel
CNC Machined Knurling on Pulley Wheel
6.5 ft. (1.9m) of Heavy Duty Nylon Ratchet Strap

Carbon Steel Housing:
- Length: 7.5" (19.0 cm)
- Width: 2.2" (5.6 cm)
- Depth: 1.8" (4.5 cm)

Capacity: 500 lbs. (226.8 kg)
Includes: 2 Carabiners
45 ft. (13.7 m) of 6mm Rope

U.S. Patent No. 8,596,615

---

**2839**

Wharncliffe: Length: 2.875" (73.0 mm)
Thickness: 0.112" (2.8 mm)
Overall: 6.563" (166.7 mm)
Weight: 1.4 oz

Drop Point: Length: 2.875" (73.0 mm)
Thickness: 0.109" (2.7 mm)

1035
Blade: Length: 2.829” (71.8 mm)
Features: Pliers
Material: Beechwood
Overall: 8.875” (225.4 mm)
Weight: 2.3 oz. (65.2 g)
Handle: Beechwood
Style: Wooden Folding Multi-Tool

• Wooden Folding Knife Kit
• Teach Knife Safety and Responsibility
• Family Craft Project Recommended for Kids 7 and Up

1036
Blade: Length: 3.250” (82.5 mm)
Material: Beechwood
Overall: 8.000” (203.2 mm)
Weight: 1.8 oz. (51.0 g)
Handle: Beechwood
Style: Folder w/ Lockback Safety

LIFETIME WARRANTY

This warranty covers any defects in materials or workmanship. If one of our knives ever breaks or fails because of material or manufacturing defect, we'll replace the knife.

This warranty runs as long as you own your knife. Coverage ends if you sell or otherwise transfer the knife to someone else, or if your CRKT® knife is modified in any way.

This warranty does not cover breakage or failure due to misuse of the knife. Knives as good as ours rarely break or fail because of a defect. Usually they break or fail from what we call "tool abuse"—using them for unsuitable tasks like prying or pounding. Therefore, blade tip breakage is not covered by our warranty. Use of a knife for any purpose other than cutting voids the warranty. So please match the tool to the task, and use your knife only for cutting. The knife will last longer, and you’ll be safer too. This warranty does not cover failure of mechanisms due to your failure to properly maintain them.

Misuse of your knife can cause serious injury or even death. It can also cause your knife to break or fail and the warranty will not apply. Failure to properly maintain your knife also may cause its mechanisms not to function properly, which could result in injury to you or damage to the knife.

Finally, consequential and incidental damages are not recoverable under this warranty. Some states do not allow the exclusion or limitation of consequential damages, so this exclusion or limitation may not apply to you.

Limited Accessory Warranty
CRKT® accessories, including deployment systems, carry systems, and sharpeners, have a one-year limited warranty against defects in material or manufacturing.

Limited Electronics Warranty
The electronic portion of CRKT® products, including LED systems, are covered by a 90-day limited warranty from the date of purchase to the original purchaser. Warranty claims must be accompanied by proof of purchase.

SPECIFICATIONS

Colors and textures in all products are as close as modern reproduction processes permit, but variations may occur in finishing processes such as anodizing and titanium nitride coating, in our swirled CPL scales, G10, and in other natural materials such as leather, horn, and wood.

We recommend you visit your local retailer and view CRKT® products under natural lighting conditions to ensure complete satisfaction. Blade lengths in this catalog are measured according to the American Knife and Tool Institute guidelines. For simplicity, we give the weight of models with a plain edge. Models with serrations will weigh a fraction of an ounce less. Specifications on products are subject to change without notice and can also be viewed on CRKT.com.
